Building, Little Rock, Ark.

FOREWORD

Following the example of a long list of progressive-minded states, Arkansas has enacted a law to regulate the practice of professional engineering, "in order to safeguard life, health and property." Its object in brief is to require that hereafter no person, with certain reasonable exceptions, shall be permitted to practice engineering in this State without first submitting satisfactory evidence that he is properly qualified, morally and technically, to so practice.

The benefits and value of such a law from the standpoint of the public good are obvious. Its aim is to maintain the standard of the profession, and if the law is conscientiously and intelligently administered, it will doubtless accomplish much.

In the light of the rapid development of the State, the ever-increasing magnitude of engineering undertakings and the vast sums of money expended in their realization, such protection as the Registration Law provides is essential, not only for the public, but for the legitimate and bona fide engineer as well.

All applicants for registration will receive the careful and conscientious consideration of the Registration Board, without fear or favor, and certificates will be issued only to engineers whose character and standing is unquestioned. Thus the reputable and competent engineer will be protected against spurious competition and the public will be assured of the highest competence.

The State Board of Registration for Professional Engineers is fully cognizant of the heavy responsibilities that rest upon it as the agency to which the administration of the law has been entrusted; and every member is firmly disposed to carry out to the utmost the high motives of the Act.

The active co-operation and respect of the State, County, Municipal and Sub-divisional Authorities as well as the Engineer, is urged in order that the law will reflect credit to the State and the Engineering Profession.

There are two hundred and nineteen (219) bona fide Registered Professional Engineers on record with the Board at the time this roster pamphlet goes to press, which proves unquestionable co-operation in the profession. Your Board has voted to print information of this character annually for your information and others who are entitled to know.

Since the administration of the Law must be carried on without legislative appropriation, the only income available to the Board for this purpose is the money derived from registration and renewal fees. The Board has sought at all times to keep the registration and renewal fees at the lowest possible amount consistent with the proper administration of the law. The Board, therefore, fixed the annual renewal fee for 1927 at Five (\$5.00) Dollars, which together with the few additional registration fees will take care of the necessary expense.

R. E. WARDEN,
President of the Board

Little Rock, Arkansas,
June 1, 1926.

Instructions and Requirements for all Engineers Making Application for Registration to Practice Professional Engineering

Applicants for registration must submit satisfactory evidence to the Board that he is more than twenty-one years of age, of good moral character and qualified to design and supervise the construction of engineering work of importance.

Engineering experience gained by the applicant prior to his reaching the age of eighteen years shall not be counted as a part of his professional experience.

Professional experience shall be considered as beginning when the candidate has entered upon a position in professional engineering work which requires original thought and responsibility. For example:

(a) In the field experience shall begin to count when the applicant reaches a position of responsibility equivalent to that of actual transitman.

(b) In the shop or laboratory experience shall begin to count only after apprenticeship, foremanship, inspectorship, or other subordinate positions unless the work done specifically shows that the applicant possesses originality of design and has had responsibility in his subordinate positions.

(c) In the office or drafting room experience shall begin to count when the applicant ceases to do merely tracing, lettering, or purely mechanical work requiring for its performance merely manual dexterity, and enters a position of responsibility where he begins actual design.

(d) Experience in the teaching of engineering shall begin to count when the applicant is a full-time instructor in engineering in an engineering school of recognized standing and each year of teaching shall be considered equivalent to one year of practice.

The applicant shall have had four years of experience in professional engineering, and in addition shall show that he is qualified to design as well as to direct engineering operations, as evidence of qualification for registration, and his experience record shall show progressive advancement in the character of the work performed.

Each case shall be considered on its merits, and the experience record must be given in such complete detail that the Board of Examiners can determine the character of work performed by the applicant.

Graduation from an Engineering School of recognized standing shall be accepted as the equivalent of two years of such practice. An Engineering School of recognized standing shall be one which requires the equivalent of a high school or preparatory school diploma as an entrance requirement and demands the equivalent of a four years' course in Engineering for graduation.

All applications must be made out on regular form P. E. 1 which will be furnished by the Secretary upon request.

A fee of fifteen (\$15.00) dollars must accompany each application when submitted and an additional fee of ten (\$10.00) dollars will be required of all successful applicants for his certificate upon advice from the Secretary. This covers fee for the calendar year in which you first register. See Sections 8, 9 and 10 of the Act.

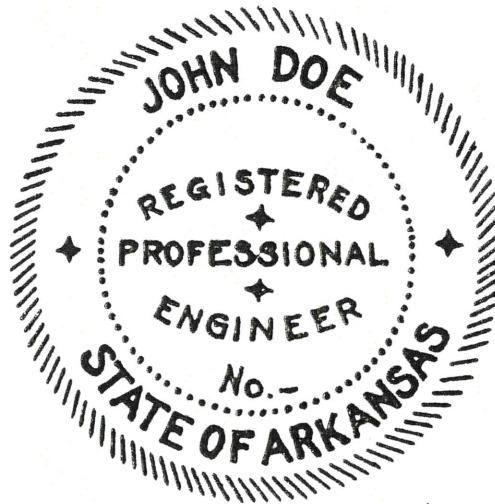

At least two examinations will be held by the Board each year; whether oral or written will be dependent upon the applicant's education and experience in handling professional engineering work of importance. The applicant when filling out his application should exercise the utmost care in answering correctly and accurately all questions on the application blank under oath. Each applicant will be advised of the Board's action prior to the following dates for the next examination.

ARKANSAS STATE BOARD OF REGISTRATION FOR PROFESSIONAL ENGINEERS

Annual renewal fee of Five (\$5.00) Dollars for all certificates is due and payable on or before December 31st each year for the ensuing year. Annual registration renewal cards will be furnished by the Secretary promptly upon receipt of the renewal fee. See Section 14 of the Act.

OFFICIAL PROFESSIONAL SEAL

Section 16 of the Act permits each Registered Professional Engineer in the State of Arkansas to use an official professional seal consisting of two concentric circles. In the outer circle will appear the personal name of the registrant the words "State of Arkansas." In the inner circle will appear the wording "Registered Professional Engineer No....." The number will be the number of your registration certificate. Below this seal, when stamped on reports, plans, specifications, etc., must appear the wording "Registration Certificate Expires December 31, 19....." This can be written in ink or by rubber stamp. All certificates expire December 31st each year, and if the rubber stamp is used all that is necessary is for the registrant to supply the year. To obtain a seal write the Secretary giving him the name you wish to appear upon the seal and the number of your registration certificate. If you desire this seal and rubber stamp, they will be ordered for you by the Secretary when requested at your expense.

Registration Certificate Expires Dec. 31, 19. . .

Seal adopted by the Board

ARKANSAS STATE BOARD OF REGISTRATION FOR PROFESSIONAL ENGINEERS

Reciprocal Registration with other State Boards

The Arkansas State Board of Registration for Professional Engineers is a member of the Council of State Boards of Engineering Examiners consisting of the states:

ARKANSAS
ARIZONA
COLORADO
FLORIDA
INDIANA
IOWA
LOUISIANA
MICHIGAN

MINNESOTA
NORTH CAROLINA
OREGON
SOUTH CAROLINA
SOUTH DAKOTA
TENNESSEE
VIRGINIA
WEST VIRGINIA

WYOMING

All Engineers registered with the Arkansas State Board are entitled to registration with the National Council providing such applicants meet the requirements of the Council. The Arkansas Board will arrange for this registration without charge, but only to those who have had ten years experience in professional engineering, and in addition shall show that they are qualified to design as well as to direct engineering operations, as evidence of qualification for reciprocal registration, and their experience record shall show progressive advancement in the character of the work performed.

Engineers who can meet all requirements of the National Council will be furnished a reciprocal registration card which will entitle them to registration in any state where the Board of that state is a member of the Council, without examination and upon compliance with the requirements of the Board they choose to become registered. The Secretary will furnish them with special application blanks upon request.

BY-LAWS ADOPTED BY THE BOARD

Section 1

1. Name

The name of this Board shall be "STATE BOARD OF REGISTRATION FOR PROFESSIONAL ENGINEERS."

2. Officers

The officers of the Board shall be, President, Vice President, Secretary and Treasurer. The latter officers may be held by the same person, who may or may not be a member of the Board.

3. Meetings

Regular meetings of the Board shall be held at 10 A. M. on the first Saturday of January and July each year. Special meetings may be called from time to time by the President when in his opinion it is necessary. Due notice of all meetings shall be given to the members by the Secretary.

4. Quorum

Three members of the Board shall at all times constitute a quorum for the transaction of business.

5. Term of Office

At the regular meeting in July of each year the Board shall elect a President, Vice President, a Secretary and a Treasurer, who shall hold office until the following July, or until such times as their successors shall have been elected and the office accepted.

6. Seal

The Seal of the Board shall be of two concentric circles approximately 2 inches and 1½ inches in diameter respectively between which shall be inscribed "STATE BOARD OF REGISTRATION FOR PROFESSIONAL ENGINEERS." Inside the smaller circle shall be the great seal of the State of Arkansas.

7. Fiscal Year

The fiscal year of the Board shall be from July 1st until June 30th of the succeeding year.

Section 2. Duties of Officers

1. President

The president shall, when present, preside at all meetings, shall appoint all committees, and shall sign all certificates and other official documents. He shall call the Board together when, in his opinion, business necessitates and shall otherwise perform all duties pertaining to the office of President.

2. Vice President

The Vice President shall in the absence of the President preside at all meetings and perform all the duties of the President, and he shall at such times possess all the powers of the President.

3. Secretary

The Secretary shall receive and receipt for all fees and other moneys and transmit them to the Treasurer. He shall sign all certificates and other official documents of the Board. He shall be responsible for the keeping of proper records of all the business transacted by the Board and for the care and the filing of all applications, correspondence and other records which from time to time may accumulate.

ARKANSAS STATE BOARD OF REGISTRATION FOR PROFESSIONAL ENGINEERS

4. Treasurer

The Treasurer shall receive from the Secretary all moneys and give his receipt therefor and shall keep and preserve a proper record of the receipts and disbursements of the same.

He shall be required to give bond in a sum to be determined by the Board.

Section 3. Procedure

1. Order of Business

1. Reading of Minutes of last meeting.
2. Reports of Committees.
3. Communications.
4. Reading and considering applications.
5. Unfinished business.
6. New business.
7. Examinations.
8. Election of Officers
9. Adjournment.

2. Rules of Order

Roberts' Rules of Order shall govern the procedure of the Board, except as may otherwise be provided by the By-laws and not subversive to the requirements of the Act.

3. Notice

Due notice of each regular or call meeting of the Board shall be mailed to each member at his last known address by the Secretary, and said mailing shall be deemed full and proper notice thereof.

4. Amendments

Notice of proposed amendments to the by-laws must be presented in writing at a regular meeting and may be voted on at that meeting, three affirmative votes being necessary to pass an amendment.

RULES OF THE BOARD

1. Form of Application

All applications for registration shall be made on printed forms provided by the Board. No application made otherwise than on such forms will be accepted for filing by the Board. In the event the printed forms of the Board do not contain sufficient space for evidence to be submitted, the applicant may attach sheets to said form to any extent desired. Such attached sheets should be of the same size as, and securely attached to, the printed forms.

2. Issuing of Certificates

If after examining the evidence as submitted, or such other evidence as the Board may require or procure, the Board is satisfied that the applicant possesses the qualifications required by the Act; in such case the applicant shall be notified, and the Board shall forthwith cause applicant to be registered and shall issue a certificate of registration duly executed as is required by the Act, and shall also issue a card to the applicant certifying to such registration. This card shall be reissued each year upon payment of the renewal fees as is provided in Section 14 of the Act.

All certificates expire on the 31st day of December following their issue or renewal.

3. References

Upon the receipt of each application regularly made, the Secretary shall prepare a digest of the information contained therein and at convenient intervals shall mail same to each and every member of the Board, who shall as promptly as possible acquaint the Secretary with any information known to him concerning the applicant's statements. Such information shall be attached to the application by the Secretary for use by the Board in considering the application. The Secretary by means of blanks specially prepared for this purpose will use due diligence in inquiring concerning the truthfulness of the applicant's statements from the references given, or by such other means as the Board may direct.

4. Rejections

In case of the rejection of an application, for any reason, the applicant shall be so notified and at the same time invited to submit additional evidence that he is entitled to have his case reconsidered or to be re-admitted to examination. A rejected applicant shall upon request be fully informed as to the reason for the rejection of his application, and he may thereafter file with the Board any reason he desires, to support a claim for reconsideration or re-examination. It will be the policy of the Board to give rejected applicants every reasonable opportunity to support claims for reconsideration and to consider such evidence as may have been omitted or overlooked on the original application or examination.

5. Registration Numbers

There will be issued by the Board consecutively in the order in which the applicants make application to and qualify before the Board. No discrimination or preference will be permitted in issuing registration numbers to applicants.

6. Seals

The Secretary may supply, at cost to be fixed, each registrant with a seal as set forth in Section 16 of the Act. He shall have recorded in the office of the Secretary of State all certificates issued and shall collect the fee therefor in advance from the registrant.

7. Explanation of Terms

To supervise means the direction of the design or construction of work where skill and judgment must be used in meeting unforeseen conditions. That one is qualified to "design and supervise" can only be proved by performance. Hence in interpreting the provisions of the Act "to design and supervise" must be a matter of judgment based on the evidence submitted.

Wherever the Board is in doubt regarding the above, the practice will be to give the State the benefit of the doubt.

Each registrant is charged with the duty of keeping the Secretary informed of any change in address.

STATE OF ARKANSAS
OFFICE OF ATTORNEY GENERAL
LITTLE ROCK, ARKANSAS

July 21, 1925

Mr. R. E. Warden, President
State Board of Registration
for Professional Engineers,
Little Rock, Arkansas.

Dear Mr. Warden:

I note with satisfaction that pursuant to the provisions of Act 202 of the recent General Assembly, the Board of Registration for Professional Engineers has completed its organization.

Thus Arkansas takes her place in that group of progressive States seeking to recognize properly your profession and to protect the public by requiring certain qualifications of those who seek to practice engineering. This, in my opinion, is a great step forward. The procedure, including the appointment of the Board and the election of officers, has apparently been in strict compliance with the law, and it is our opinion that you may now proceed to enforce the provisions of the Act.

Section 16 protects the profession and the public by providing that a seal may be used by registrants upon plans, specifications, plats and reports. Any person unlawfully using the seal shall be deemed guilty of a misdemeanor, punishable by a fine of not less than Ten Dollars nor more than One Hundred Dollars.

Section 19 provides that any person practicing or offering to practice professional engineering without a proper certificate shall be deemed guilty of a misdemeanor, punishable by a fine of not less than Ten Dollars nor more than Two Hundred Dollars, or by imprisonment.

We are sure you will find the prosecuting attorneys of the State anxious to co-operate with you in enforcing these provisions. The constitutionality of this Act should not be questioned. While the courts will always seek to protect one in the pursuit of a calling where constitutional rights are involved, it must be recognized that the State may protect the public from ignorance and incompetence in certain professions. We quote the following language from the case of *People vs. Evans*, 247 Ill. 547:

"In the exercise of the police power of the State the legislature may prescribe regulations for securing the admission of qualified persons to all callings demanding special knowledge, experience and skill."

Assuring you that this office will be glad to be of service at any time, I am

Respectfully yours,
BROOKS HAYS
Assistant Attorney General.

ACT NUMBER 202

AN ACT TO REGULATE THE PRACTICE OF PROFESSIONAL
ENGINEERING, AND FOR OTHER PURPOSES

Be It Enacted by the General Assembly of the State of Arkansas.

Be It Enacted by the People of the State of Arkansas:

Section 1. In order to safeguard life, health, and property, any person practicing or offering to practice as a professional engineer in this State, shall hereafter be required to submit evidence that he is qualified so to practice, and shall be registered as hereinafter provided, and from and after twelve months after this Act becomes effective, it shall be unlawful for any person to practice or offer to practice, as a professional engineer in this State, unless such person has been duly registered, or specifically exempted as required by the provisions of this Act.

Section 2. Nothing in this Act shall be construed as requiring registration for the purpose of practicing professional engineering, by an individual, firm, or corporation on or in connection with property owned or leased by said individual, firm or corporation, unless the same involves the public health or safety, or the health or safety of employees of said individual, firm or corporation, provided however, the person so practicing shall not represent himself as, or use the title of registered professional engineer unless such person is qualified by registration under this Act.

Section 3. There is hereby created a State Board of Registration for Professional Engineers, hereinafter called the "Board" consisting of five members to be appointed by the Governor within ninety days after the passage of this Act. Of the members of the Board first appointed hereunder, two shall hold office for a term of two years, two shall hold office for a term of three years, and one shall hold office for a term of four years, each term of office ending the first day of July. Upon the expiration of such terms, the term of office of each member thereafter appointed shall be for four years. Each member shall hold office until his successor shall be duly appointed and qualified. The Governor may remove any member of the board for misconduct, incompetency or neglect of duty. Vacancies on the Board, however created, shall be filled by the Governor for the unexpired term. Each member of the Board shall be a citizen of the United States and a professional engineer of at least ten years active experience, and of good standing in his profession, and shall be at least thirty-five (35) years of age, and shall have been a resident of this State for at least three years immediately preceding his appointment. Each member of said board, except the members first appointed hereunder, shall also be registered as a professional engineer at the time of his appointment. Each member of the Board shall serve without compensation, except that he shall be repaid his actual necessary expenses incident to the performance of his duties under this Act.

Section 4. Each member of the Board first appointed shall receive a certificate of registration from the Governor without being required to pay any fee therefor. The board shall have the power to compel the attendance of witnesses, and any member may administer oaths and may take testimony and proof concerning all matters within the Board's jurisdiction. The Board shall adopt and have an official seal which shall be affixed to all certificates of registration.

Section 5. The Board shall hold a meeting within thirty days after its members are first appointed, and shall organize by electing one of its members as president, and one as vice president, and shall within sixty days after its first meeting adopt such regulations and by-laws not inconsistent with law, as may be required to enable it to perform the duties and to transact the business required to carry out the provisions of this Act. Thereafter said Board shall hold at least two regular meetings each year and shall elect annually from its members a president and a vice president. The Board

shall appoint a secretary and a treasurer who may or may not be members of the Board, and who shall hold office during its pleasure. The same person may be appointed to fill both offices of secretary and treasurer if the Board so elects.

Section 6. The Board shall determine the amount of each fee required by this Act, within the limit prescribed by the Act. All fees for the examination and registration of the Professional Engineers hereunder shall be paid to the Treasurer of the Board, who shall issue receipts therefor, and all such fees shall be deposited by said Treasurer to the credit of the "Treasurer of the State Board of Registration for Professional Engineers" in a depository to be designated by the Board. The Secretary and the Treasurer shall each make a good and sufficient bond unto the State Board of Registration for Professional Engineers for the faithful performance of his duties as such officer and for the proper accounting for all money so handled, in such sum and with such surety as the Board shall deem proper. In case the same person is appointed to both of these offices, only one such bond shall be required.

Section 7. The Board shall fix the salaries of the secretary and the treasurer, and may employ and fix the salaries of such clerks, stenographers or other agents as may be necessary for the transaction of its duties. All salaries of appointees and employees of said Board, and all other expenses, proper and necessary in the opinion of the Board, for the discharge of its duties and the enforcement of this law, shall be paid out of the funds by the Treasurer as herein provided. The payments shall be by voucher checks issued by the treasurer in accordance with allowances approved by the president of the Board, and in compliance with the general regulations of the Board covering expenditures of its funds.

Section 8. Application for registration shall be made to the Board on its prescribed form, accompanied by a fee not to exceed fifteen (\$15) dollars, the said fee to be retained by the Board. The applicant shall submit satisfactory evidence that he (a) is more than twenty-one years of age; (b) is of good character; (c) has had four years active experience as an engineer in one or more branches of the profession, graduation from an engineering school of recognized standing being considered as equivalent to two years of such experience; (d) is qualified to design and supervise the construction of engineering work of importance.

Section 9. Examinations of applicants for registration shall be held [at least twice a year at such times and places within the State and in such manner as the Board shall determine.

Section 10. Any applicant who has passed the examination prescribed by the Board in a manner satisfactory to a majority of the Board, upon payment of an additional fee, not to exceed ten dollars, shall have issued to him a certificate of registration signed by the president and the secretary of the Board under seal of the Board, authorizing him to practice as a professional engineer, any applicant may in the discretion of the board, be issued a temporary permit to practice until his application has been finally acted upon by the Board. Such temporary permit must be signed by both the president and the secretary of the board, and shall not be valid after final action by the board upon the application.

Section 11. At any time after this act becomes effective, and before the first of January, 1926, certificates of registration may be issued without examination. Any person who within that time shall submit to the board satisfactory evidence that he is of good moral character, and has been a resident of Arkansas and engaged in the practice of professional engineering for at least one year immediately preceding the date upon which this Act becomes effective, shall be entitled to have issued to him such a certificate upon the payment of a fee not to exceed twenty-five dollars, but no certificate shall be issued without examination after the thirty-first day of December, 1925.

Section 12. The Board is hereby empowered to arrange for reciprocal registration of professional engineers from other States, territories, and countries to practice in this State under terms mutually agreed upon. The secretary of the Board upon the presentation to him by any person, of satisfactory evidence that holds a reciprocal registration issued to such person by proper authorities in any such state, territory, or country, shall upon the receipt of a fee not to exceed ten (\$10.00) dollars issue to such person a certificate of registration under this Act.

Section 13. The Board shall have the power to suspend or revoke the certificate of registration of any person registered hereunder who is found guilty of any fraud or deceit in his practice or in securing a certificate of registration, or of gross negligence, incompetence, or misconduct in the practice of professional engineering. Proceedings for revocation of a certificate of registration shall be begun by filing with the secretary of the board charges against the accused. Such charges shall be in writing and sworn to by the complainant. The Board unless it deems the charges trivial or unfounded, shall designate a time, not later than three months from date of filing the charges, and a place for hearing. A copy of the charge together with a notice of the time and place of hearing shall be served on the accused at least twenty days before the date fixed for hearing. The accused shall have the right to appear personally or by counsel, to cross-examine witnesses and to produce evidence and witnesses in his defense. If after said hearing, four-fifths of the members of the Board vote in favor of finding the accused guilty of any fraud or deceit in his practice or in obtaining a certificate of registration, or of gross negligence, incompetence or misconduct in the practice of professional engineering, the Board shall revoke the certificate of registration of the accused. Any person whose certificate of registration shall have been so revoked by the board, may within three months from the date of the final order by the Board, appeal therefrom to the Circuit Court.

Section 14. Every professional engineer registered under this Act who desires to continue the practice of his profession, shall annually pay a fee not to exceed fifteen (\$15.00) dollars on or before a date to be fixed by the Board, for which fee a renewal certificate of registration for the current year shall be issued. Certificates of registration revoked for failure to pay renewal fee may be reissued under rules and regulations prescribed by the Board.

Section 15. An unrevoked or unexpired certificate of registration issued as provided in this Act shall be presumptive evidence in all courts and places that the person named therein is legally registered.

Section 16. Each registrant hereunder may, after registration, obtain a seal of the design authorized by the Board, bearing the registrant's name and legend "Registered Professional Engineer." Plans, specifications, plats, and reports issued by a registrant may be stamped with the said seal during the life of the registrant's certificate, but it shall be unlawful to stamp or seal any document with said seal after the certificate of the registrant named thereon has expired or has been revoked unless said certificate shall have been renewed or reissued. All documents so stamped shall also bear immediately under such seal, the date at which the certificate of registration expires. Any person who shall stamp or seal any document with such seal contrary to the provisions of this section or who shall knowingly place a false date of expiration under such seal, shall be deemed guilty of a misdemeanor, and upon conviction thereof shall be punished by a fine of not less than ten (\$10.00) dollars, nor more than one hundred (\$100.00) dollars.

Section 17. Nothing in this Act shall be construed as prohibiting a corporation, association, or partnership from engaging in the practice of professional engineering in this State, provided the person or persons connected with such corporation or partnership in responsible charge of the designing of supervision which constitutes such practice, is or are registered as herein required. (The same exemptions shall apply to corporations as apply to individuals).

Section 18. The following shall be exempt from the provisions of this Act.

(a) Any person not a resident of and having no established place of business in this State, practicing as a professional engineer therein, when such practice does not exceed in the aggregate thirty days in any calendar year; provided that said person is legally registered as a professional engineer in his own state or country, and has notified the secretary of his intention to practice in this manner.

(b) Any person not a resident of and having no established place of business in this State, practicing as a consulting associate of a registered professional engineer, engaged in professional engineering, when such practice does not exceed in the aggregate thirty days in any calendar year.

(c) An employee of a registered engineer engaged in professional engineering, or an employee of a professional engineer exempted under this act.

(d) Officers and employees of the United States Government practicing solely as such officers or employees.

(e) Officers and employees of this State or any subdivision thereof, practicing solely as such officers or employees, and who hold such office or are so employed at the date this Act becomes effective, during the remainder of their term of office or employment.

Section 19. Any person, who after the thirty-first day of December, 1925, is not legally authorized to practice professional engineering in this State according to the provisions of this Act, and shall so practice or offer to practice in this State except he be exempted under this Act, and any person presenting or attempting to file as his own the certificate of registration of another, or who shall give false evidence of any kind to the Board, or to any member thereof, in obtaining a certificate of registration, or who shall falsely impersonate any other practitioner, of like or different name, or who shall use an expired or revoked certificate of registration, shall be deemed guilty of a misdemeanor and shall for each such offense of which he is convicted, be punished by a fine of not less than ten (\$10.00) dollars, nor more than two hundred (\$200.00) dollars, or by imprisonment for not to exceed three months or by both fine and imprisonment, and each day of such practice or attempt to practice, or use of an expired or revoked certificate of registration, shall constitute a separate offense.

Section 20. If any section or sections of this Act shall be declared unconstitutional, or invalid, this shall not invalidate any other section.

Section 21. All laws or parts of laws in conflict with the provisions of this act be and the same are hereby repealed and this act shall be in force 90 days after its passage.

Approved: March 21, 1925.
