Slide 3

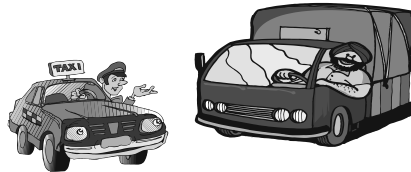

Slide 4

How many times have you -

- Jammed on your brakes to avoid another car?
- Had a near-miss at an intersection?
- Ran a red light or a stop sign?
- Almost sideswiped another vehicle?
- Skidded out of control?

Slide 5

Decision Driving can help you avoid those common emergencies.

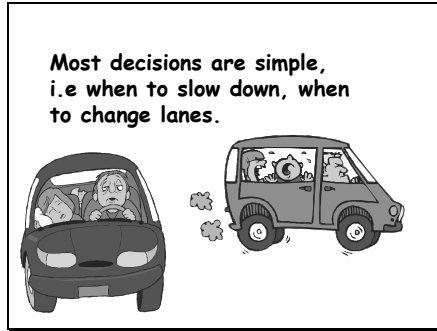

Slide 6

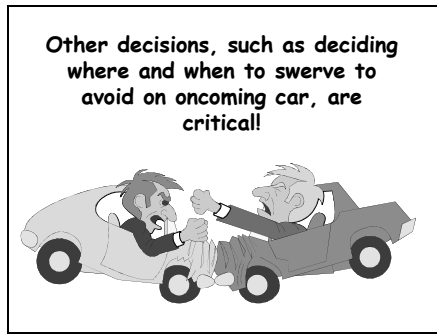

Decision Driving helps you see hazards before they become dangerous so you have time to decide how to avoid them.

Slide 10

2. Size Up the Whole Scene

- Know what's going on around your vehicle.
- Scan the scene for:
Developing traffic situations,
construction zones,
congested intersections,
erratic drivers,
pedestrians, cyclists,
changing road conditions

Slide 11

3. Signal Your Intentions Early

- Let other drivers know what you intend to do so they can have time to respond.

Slide 12

4. Plan an Escape Route

- Think Ahead - You may need to react quickly if something unexpected happens
- Look for a way out that allows enough time, space and visibility to stop or maneuver.
- Don't tailgate!

Slide 13

5. Take Decisive Action

- If you have followed the other 4 principles, you will:
 - ✓ Know what to do,
 - ✓ Have the time to do it,
 - ✓ Have the space to do it safely, and
 - ✓ Make the decision and do it.
