---

---

Slide 6

---

---

---

---

---

---

---

Slide 7

What are  
a broken outlet, boy  
playing with cord, and a  
taped electrical cord?

---

---

---

---

---

---

---

Slide 8

FIND THE HAZARD

---

---

---

---

---

---

---

Slide 9

What are  
bulbs that have a higher  
wattage for fixture, overloaded  
outlet, Dad pulling on vacuum  
cord, and taped lamp cord?

---

---

---

---

---

---

---

Slide 10

---

---

---

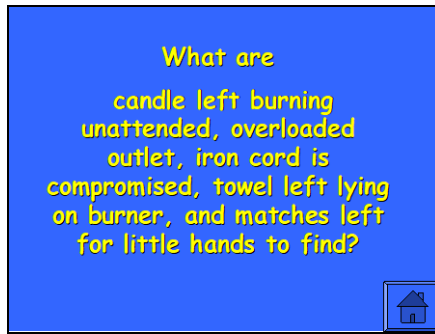

---

---

---

---

Slide 11

---

---

---

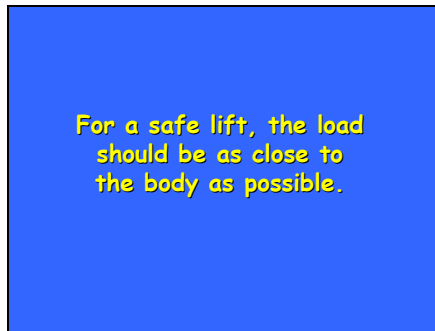

---

---

---

---

Slide 12

---

---

---

---

---

---

---

Slide 13

**TRUE**

Generally safer to keep load close to body's center of gravity.

---

---

---

---

---

---

---

Slide 14

People will walk around spilled liquid on the floor. The best thing to do is wait for housekeeping staff to clean up spills properly.

---

---

---

---

---

---

---

Slide 15

**FALSE**

Slips, trips, and falls are a leading cause of workplace accidents. Take responsibility. Clean it up, report it, or at least put up a sign.

---

---

---

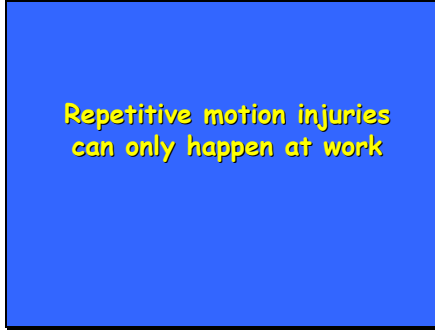

---

---

---

---

Slide 16

---

---

---

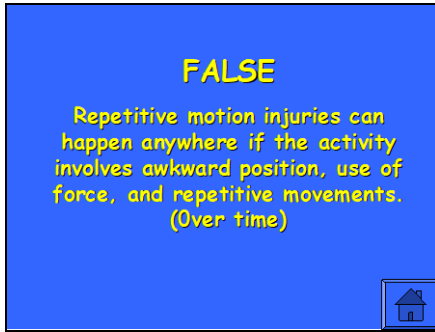

---

---

---

---

Slide 17

---

---

---

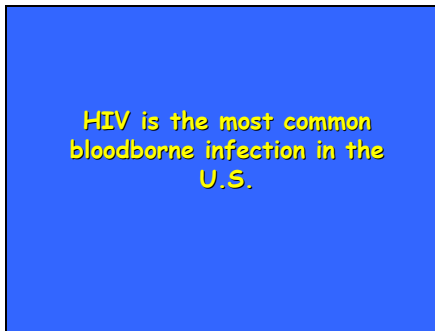

---

---

---

---

Slide 18

---

---

---

---

---

---

---

Slide 19

**FALSE:**

OSHA reports that Hepatitis C is the most chronic bloodborne infection in the U.S. affecting about 4 million.

---

---

---

---

---

---

---

Slide 20

Anyone can safely pick up a fire extinguisher to put out a fire.

---

---

---

---

---

---

---

Slide 21

**FALSE**

Only those trained to use the particular type extinguisher should attempt to put out small fires

---

---

---

---

---

---

---

Slide 22

---

---

---

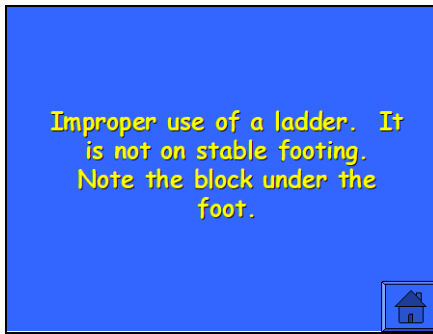

---

---

---

---

Slide 23

---

---

---

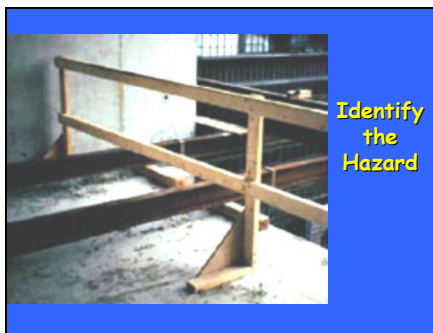

---

---

---

---

Slide 24

---

---

---

---

---

---

---

Slide 25

What is  
a missing toe board?

---

---

---

---

---

---

---

Slide 26

Identify  
the  
Hazard

---

---

---

---

---

---

---

Slide 27

What is  
rebar not properly protected?  
If you can't use mushroom caps,  
it's best to use a guardrail!

---

---

---

---

---

---

---

Slide 28

---

---

---

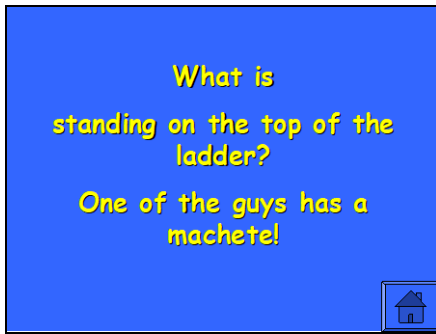

---

---

---

---

Slide 29

---

---

---

---

---

---

---

Slide 30

---

---

---

---

---

---

---

Slide 31

What is  
an inadequate guardrail?  
Must have full enclosure.

---

---

---

---

---

---

---

Slide 32

This document outlines  
procedures for employees who  
remain behind for critical  
operations before evacuating  
during an emergency.

---

---

---

---

---

---

---

Slide 33

What is  
an Emergency Action Plan?

---

---

---

---

---

---

---

Slide 34

Name at least 3 things your emergency action plan should include.

---

---

---

---

---

---

---

Slide 35

What are

- Escape procedures & routes
  - Shut down procedures
- System for accounting for employees
- Rescue and medical duties
  - Reporting fires & other emergencies
- List of responsible parties 

---

---

---

---

---

---

---

Slide 36

Name at least 3 types of emergencies that your plan should address

---

---

---

---

---

---

---

Slide 37

What are -

- Fire
- Tornado
- Explosion
- Bomb (terrorist)
- Earthquakes
- Floods

---

---

---

---

---

---

---

Slide 38

How often should emergency preparedness training be conducted?

---

---

---

---

---

---

---

Slide 39

What is annually?

---

---

---

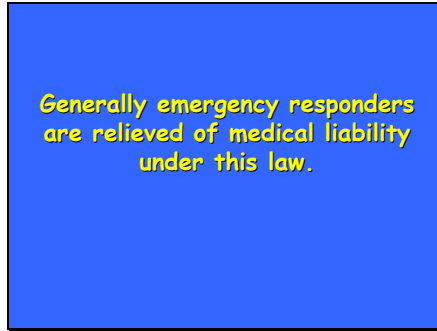

---

---

---

---

Slide 40

---

---

---

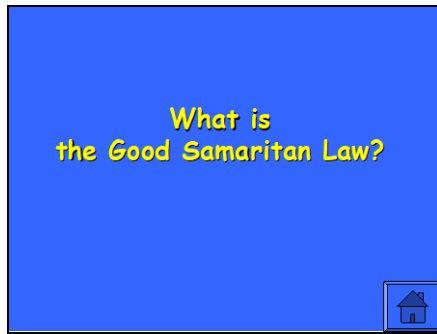

---

---

---
