

ARKANSAS DEPARTMENT OF LABOR & LICENSING

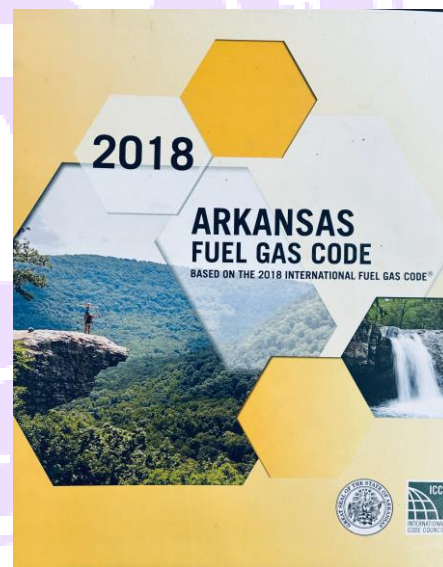

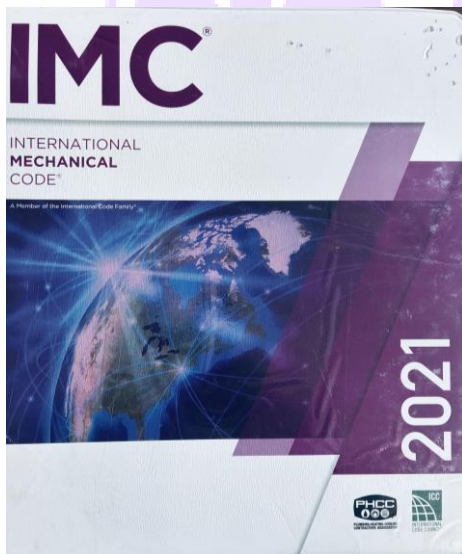

MUNICIPAL HVACR INSPECTOR TRAINING DATES

2026 SCHEDULE

Starting April 28th through August 5th, 2026, the Department invites Arkansas municipal inspectors to sign up for free HVAC/R Inspector Training. Each course will provide essential information from basic inspections to technical training provided by the Departments very own HVAC/R Mechanical Chief Mr. Tony Woodard.

Tony has more than 30 years' experience in the field and has designed a 2-day training certification course that will involve 12- hours of classroom instruction, 8 hours on day 1 followed by 4 hours on day two and wrapping up with an exam. Passing the exam will provide you with an Arkansas HVAC/R Municipal certification which is needed to apply for the Municipal Inspector License. The department will provide re-certification courses in 2027 as well as certificate training for anyone who needs to obtain their certification.

While many materials will be provided, all attendees should bring a copy of their 2021 IMC code book and a copy of the 2018 Arkansas fuel gas code book. (*the department will not provide*)

Class schedules are limited; certificates will be given upon completion of the exam accompanied with verified attendance.

The full course schedule is listed below:
Classrooms are limited
